JPL DATA SUPPORT
Player Performance Tracking

FOR CLUBS, ACADEMIES & COACHES

The benefits of centrally tracking players

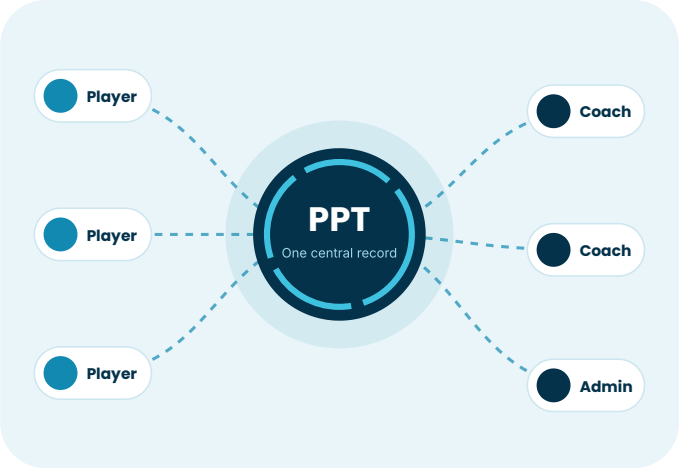
When every player's rounds, practice, statistics and lesson notes live in one secure system, coaching becomes more joined-up, decisions are evidence-based and nothing gets lost.

ONE SOURCE OF TRUTH

Everyone works from the same picture

Player information is often spread across notebooks, spreadsheets, phone notes and messages — held by different people and easily lost. PPT brings it together, with role-based access for Admins, Coaches and Players.

- Players log once — approved coaches and admins see it
- History stays with the player, not with one coach



KEY BENEFITS

Complete player history

Every round, practice session and lesson note in one timeline — available years later, not lost in a notebook.

Continuity between coaches

If a player changes coach or works with several, everyone sees the same history and picks up where the last left off.

Programme-wide view

See how players are progressing across a squad or group and spot who needs extra support.

Evidence-based decisions

Use consistent data to support selection, squad placement and coaching priorities — not just opinion.

Saves admin time

No more chasing scorecards or merging spreadsheets. Data is entered once and always up to date.

Controlled access

Coaches request access and an Admin approves it, so each player's information is only seen by the right people.

Without central tracking

- Data scattered across paper, spreadsheets and phones
- Progress lost when players or coaches move on

With PPT

- One secure, organised record for every player
- Full history follows the player throughout their journey
