JPL DATA SUPPORT
Player Performance Tracking

COACH INFORMATION SHEET

Coach smarter with real player data

PPT gives coaches a single, organised view of every player they work with — their rounds, practice, statistics and lesson history — so every session starts from facts, not guesswork.

WHAT IS PPT?

Your players' performance, in one place

Player Performance Tracking (PPT) is a golf performance platform from JPL Data Support. Players log their rounds and practice; you see the trends, add lesson notes and track progress over time.

- See every linked player from one coach dashboard
- Spot strengths and weaknesses before the lesson starts
- Keep lesson notes alongside the data they relate to

BUILT FOR COACHES

Player roster

All the players linked to you in one list, with quick access to each player's dashboard and history.

Analytics & trends

Charts of scoring, greens in regulation, putting, fairways and more — see what's improving and what isn't.

Lesson notes

Record what you worked on, drills set and next steps. Notes stay with the player's record, ready for next time.

Rounds & practice

View the rounds and practice sessions your players log, so you understand what happens between lessons.

Focused sessions

Use the numbers to prioritise the area that will save the most shots, and show players why it matters.

Approved access

Coaches request access to players and an Admin approves it — so players' data is only seen by the right people.

01
Request access
Request to link with your players from your coach account.

02
Admin approves
An Admin reviews and approves each coach–player link.

03
Review the data
Open a player's dashboard to see rounds, practice and trends.

04
Coach & record
Deliver the lesson and log your notes and next steps.
