COACH GUIDE

Making the most of lesson notes

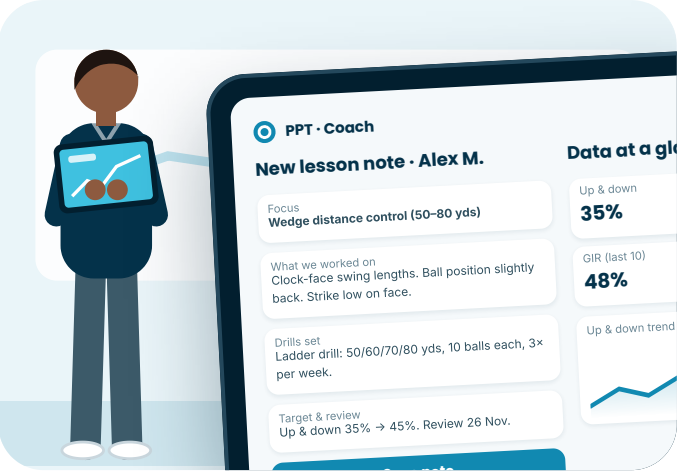
Good lesson notes turn a one-hour session into a plan the player can follow all week — and give you a clear record to build the next lesson on.

WHY IT MATTERS

Notes that sit next to the data

In PPT, lesson notes are stored on the player's record alongside their rounds, practice and stats. So you can link what you worked on to what then happens on the course — and see if it's working.

- Players remember more when the key points are written down
- Your next lesson starts where the last one ended
- Progress can be checked against the numbers, not memory



WHAT EVERY GREAT NOTE INCLUDES

Focus
One main focus. What is the lesson about?

What we did
The key changes or feelings, in the player's words where possible.

Drills set
Specific drills, with reps and how often.

Target
A measurable goal linked to a PPT stat.

Review date
When you'll check progress together.

✕ VAGUE NOTE

"Worked on chipping. Getting better. Keep practising."

No clear focus, nothing to practise and no way to measure whether it worked.

✓ GREAT NOTE

Focus	Chipping from 10–20 yds off the green
What we did	Narrow stance, weight left, hands ahead. "Brush the grass."
Drills set	Landing-spot towel drill, 3 × 20 balls, 3 times a week
Target	Up & downs from 22% to 30% over the next 6 rounds
Review	Next lesson — compare PPT stats before and after

01 Before
Check the player's PPT dashboard and last lesson note.

02 During
Agree one focus and jot down key phrases the player uses.

03 After
Write the note the same day — drills, target, review date.

04 Next time
Open with the data: has the target stat moved?
