Player Performance Tracking

FOR PLAYERS

Why track your statistics?

Your scorecard tells you *what* you shot. Your statistics tell you *why*. Tracking them is the fastest way to stop guessing and start improving.

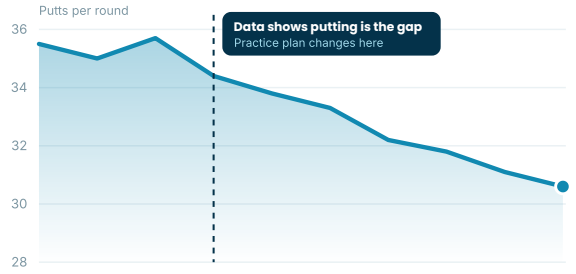
FEELINGS VS FACTS

Memory plays tricks. Numbers don't.

After a round we remember the big moments — the drive out of bounds, the long putt that dropped. But scores are usually decided by the quiet, repeated shots: the 3-putts, the missed greens from 100 yards, the chips left 10 feet short.

When you track the same stats every round, patterns appear that you would never spot from memory. That tells you exactly where your next shots will come from.

Example: one player's season *Illustrative example*



THE KEY STATS TO TRACK

Fairways hit	How often your tee shot finds the fairway — shows driving accuracy.
Greens in regulation	Reaching the green in par minus two — a strong measure of ball-striking.
Putts per round	Total putts, plus how many 3-putts — shows putting and lag control.
Up & downs	How often you save par after missing a green — your short-game score.
Penalty shots	Shots lost to water, out of bounds or unplayables — the costliest mistakes.

HOW TRACKING HELPS YOU IMPROVE

Find your real weakness

Know which part of your game is costing the most shots, rather than practising what you already do well.

Practise with purpose

Turn every practice session into a targeted plan built around your numbers.

See proof of progress

Watch your trends move in the right direction — real motivation to keep going.

Top tips: track every round · be honest · review once a month · pick one stat to improve at a time

PPT does the maths for you — log your round and your dashboard updates automatically.
